## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9 and 19, drawn to A circuit connecting material and a method of making the connected structure.

Group II, claim(s) 10-18, drawn to A circuit member connecting structure.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The Group-I is drawn to a composition containing a bonding agent and conductive particles, and the Group-II is drawn to a circuit member connecting structure that requires disposing a composition between main surface of First and Second circuit members, wherein circuit member contains insulating substance and conductive particles and the first circuit electrodes and second circuit electrodes are connected and they do not have same common technical features.

A telephone call was not made to request an oral election to the above restriction requirement, due to the complexity of the inventions. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must

be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
